Department of International Cooperation, MOST
China Science and Technology Exchange Center

International Talented Young Scientists Salon

Introduction

Since its inception, TYSP has provided a platform for young scientists worldwide to grow and pursue their aspirations. The program has provided partner countries with valuable experience and trustworthy partners from China, helping them address socio-economic development challenges and enhance the well-being of their people through cooperation in science, technology and innovation. By fostering a community of inno-

vation built on mutual trust, cooperation and coordination, and shared prosperity, TYSP has contributed significantly to advancing academic exchange, joint research, platform development, and technology transfer. This has led to a substantial number of concrete and impactful collaborative achievements.

The Talented Young Scientist Program (TYSP) is guided by the vision of building a community with a shared future for mankind, advocating and implementing the Global Development Initiative, Global Security Initiative, and Global Civilization Initiative, and promoting the building of the Belt and Road into a road of innovation. The program is founded on the principles of merit-based selection, a people-centered approach, openness, inclusiveness, and mutual learning on equal terms. It provides funding for outstanding young scientists, scholars, and researchers from around the world to conduct exchanges in China. It aims to strengthen the scientific and technological capacity of partner countries, enhance their innovation capabilities, and promote sci-tech people-to-people exchanges between China and the international community. The program also serves as a premier platform for young scientists to engage in mutual learning, fostering long-term and stable partnerships in science and technology with relevant countries and building consensus and understanding among people.

Cooperation Partners

Chinese partners

Competent Authority: Department of International Cooperation, MOST
Executive Agency: China Science and Technology Exchange Center
Review departments for job recommendation: The relevant departments or bureaus responsible for international science and technology cooperation within the superior administrative authority of the host institution, or the science and technology departments (commissions or bureaus) of the provinces, autonomous regions, municipalities directly under the central government, or cities specifically designated in the state plan where the host institution is located
Host Institute: Research institutes, universities, enterprises, and other entities legally established in China, possessing the necessary channels and capabilities for international cooperation, and holding legal person status

Recommendation institutions for TYSP candidates: Foreign government science and technology management departments or national science foundations, international organizations or research institutions that have signed science cooperation agreements with China, foreign embassies in China, Chinese embassies and consulates abroad, or the Office of the China Association for International Exchange of Personnel

Current institutions of TYSP candidates: The applicant's current employer in his/ her home country

TYSP candidates: Outstanding foreign young scientists, scholars, and researchers who have received TYSP funding

Foreign partners

Procedures

Stage I Post Information on Vacancies

Qualification for job posters

Research institutes, universities, enterprises, and other entities legally established in China, possessing the necessary channels and capabilities for international cooperation, and holding legal person status

Job requirements

1. Non-degree education
2. Research or science policy positions with clearly defined responsibilities
3. Work with Chinese researchers required for TYSP candidates

Stage II Apply for the Position

Application and approval timeline

1. Applications for jobs and TYSP candidates are accepted year-round
2. Approval timelines will be determined based on operational arrangements and will follow the dates announced on the official website

Eligibility criteria for TYSP candidates

Applicants shall obtain a recommendation letter from one of the following entities: the science and technology management department of their home government, a national science foundation, their home country's embassy or consulate in China, a Chinese embassy or consulate abroad, or an overseas office of the China Association for International Exchange of Personnel (recommendation institutions for short). In addition, they shall meet the following criteria:

1. Be a national of a Belt and Road partner country or a developing country
2. Hold a formal position in their home country, engaged in research or science policy studies
3. Hold a PhD degree or have at least five years of research experience
4. Demonstrate a high level of scientific expertise or research potential
5. Be under the age of 45 (as of the date of the application) and in good health
6. Be proficient in English or Chinese
7. Be able to work full-time in China during the application period
8. Abide by Chinese laws, regulations, and other relevant rules
